120.00	MSI-51	5"	1-1/8"		
165.00	MSI-52	5"	2"		

Our Bumper Sweepers are constructed using high strength C8 magnetic material encased in a heavy duty, welded stainless steel can with carbon steel backing plate. These magnets will last virtually forever. A note on sizes: Thickness (B dimension) determines the height you can mount it above the ground. Whilst the width (A dimension) enables a faster ground speed. All of our Bumper Sweepers are custom built per order, with a minimum of 2' for pricing. Other mounting is available, such as forklift mounts similar to a wooden pallet layout, for additional cost.
