Magna-Caps

SPEEDS CAPPING OF PLASTIC LETTERS

Four models are available – Designed to firmly hold plastic capping against any irregular shaped letter.

Lifetime ceramic magnet, all welded construction

A = Magnet B = Steel Sheet
 C = Capping D = Plastic Letter

The shapes and sizes of Magna-Caps are the result of several years of working with various users. Special shapes and sizes can be made to fit your need. Send a sketch and specifications to your supplier or to Magnetic Specialties, Inc. 9812 S.E. Empire Ct., Clackamas, OR 97015

TECHNIQUE FOR USING MAGNA-CAPS

1. Cover workbench with a sheet of 18 gauge galvanized steel.
2. Place letter to be capped on the sheet steel and anchor with four or five Magna-Caps.
3. Apply capping – Place Magna-Caps wherever needed to hold capping against the letter.
4. When capping is completed. Apply cement and allow to dry before removing Magna-Caps.

Users of Magna-Caps report cost reductions of over 75% when used to hold capping in place. Capping is less likely to shift. Also they like the absence of wood splinters, dirt, and nails that could impair the quality and appearance of their finished product.
